...and remember: we welcome applications from candidates who are doing, or have done, well in Chemistry  
and at least one, but preferably two, other school science/maths subjects (Biology, Physics, Maths or  
Further Maths). If you think you are likely to achieve A*AA in these subjects, we encourage you to apply.  
Indeed, if you are doing very well in science/maths at school, you may find Cambridge is the vet course on  
which you are most likely to be offered a place.
