

Connecting to shared folders on Vetmed IFS macOS

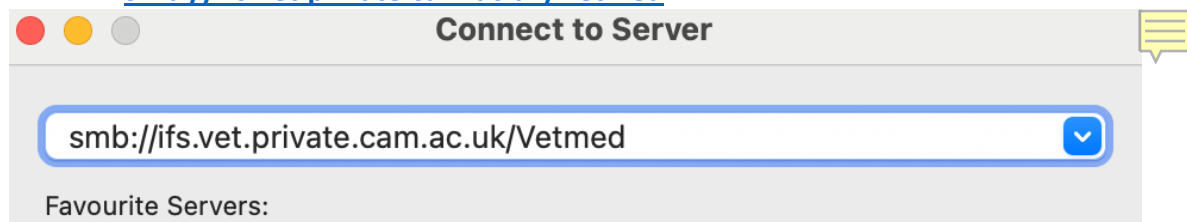

If you are connected to eduroam you do not need Vet VPN. If you are off-site, e.g. at home, then you must first connect to Vet VPN before attempting to connect to the IFS share.

Connecting to Vet IFS shared folders

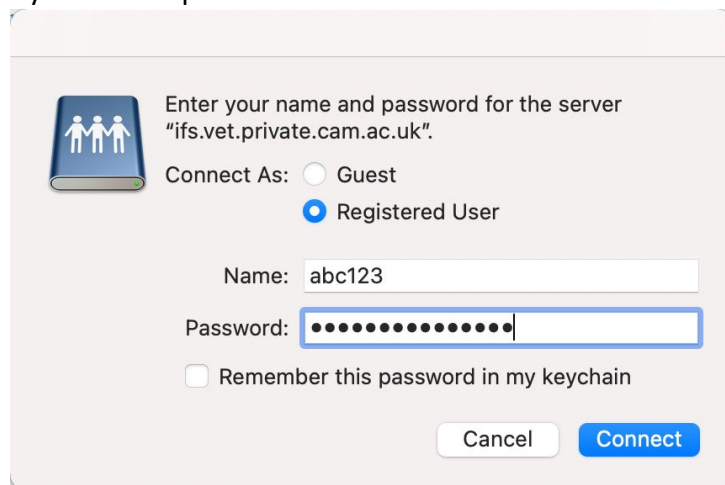

Go to the **Finder** app and select the 'Go' > 'Connect to Server...' (or as a shortcut press the $\text{⌘} + \text{K}$ keys when in Finder).

1. In the Connect to Server dialogue box type [smb://ifs.vet.private.cam.ac.uk/Vetmed](https://ifs.vet.private.cam.ac.uk/Vetmed)

2. Click on the '+' to add the server address to the 'Favourite Servers' list (you only need do this once to remember the volume mount path).
3. When prompted enter your username as 'YourCRSID' (eg **abc123**) and your password is your Raven password.

4. Click '**Connect**' and the Vetmed IFS server volume will be mounted in Finder, where you can open your files.
